AIM and SCOPE:

Academy for Faculty Development (AFD) at Vignan University conducts workshops that will expose the teaching staff to active learning mechanisms. AFD strives to make Engineering Education enjoyable, simpler, easy for the learner as well as the teacher. This workshop is designed to give hands-on experience to the participating faculty members in Content Design, writing outcomes, Teaching-Learning as per outcomes, setting questions as per outcomes and exposure to active learning mechanisms.

With National Board of Accreditation(NBA) of AICTE intending to accredit engineering programs based on Outcomes, autonomous Institutions, deemed universities and private engineering colleges offering engineering programs have to be ready with procedures and processes compatible with Outcome Based Education. Teaching -Learning processes have to be amended so as to incorporate active learning methods. **This workshop is designed to train the faculty of electrical, electronics, CSE, and Instrumentation engineering** so that they can independently handle outcome based accreditation processes and act as catalysts in change processes towards Outcome based Education in Engineering. Faculty of departments like Civil, Mechanical, Chemical and others will equally be benefitted by this workshop.
